SUNBELT SAFETY SERVICES

CORPORATE BROCHURE

YOUR SAFETY IS OUR PRIORITY

Sunbelt is a trusted and recognised partner in the energy industry. We provide safety solutions and state-of-the-art H₂S safety equipment to the offshore and onshore oil & gas and renewable energy markets. We integrate health, safety, and environmental management systems for our customers, ensuring alignment with regional and international industry standards. We are a proud member of the **Lamprell Group**.

WHO WE ARE

With over 40 years of experience, our qualified team of experts is dedicated to creating, strengthening, and promoting a strong safety culture and environment within your worksite.

We support and assist our clients in the following key areas:

- H₂S and safety equipment rental and/or purchase
- Equipment recertification, servicing, and maintenance
- Equipment installation and commissioning
- Specialised safety professionals
- Safety training, consulting and supervision
- Expert H₂S safety services

Our team of committed professionals tailor safety solutions to each customer's needs. Whether your team is setting up safety services, needs installation support, equipment, training, or emergency response services, we can help.

OUR VISION AND VALUES

To be a global leader and partner of choice in providing efficient and innovative solutions to the energy sector while focusing on our commitment to the environment, our workforce and our stakeholders.

United by our values

How we do business is as important as what we do. Our values unite us, underpin our culture, define who we are, and make us distinctive. They guide our behaviours and actions. As members of the Lamprell Group, we uphold the same values that collectively drive us towards excellence.

Safety: We deliver world-class safety results and leave nothing to chance so everybody goes home safely

Integrity: We conduct our business with honesty, integrity, and transparency, maintaining high ethical standards with all our stakeholders

Sustainability: We strive to enhance our contribution to environmental protection and make a meaningful difference to society

Teamwork: We work alongside our stakeholders and believe great teams can achieve incredible results

Accountability: We are accountable and deliver on our commitments

Financial responsibility: We treat the Company's funds and assets like they are our own

OPERATIONAL AND CONSULTING SERVICES

H₂S equipment rental and installation

Sunbelt offers a large selection of high-quality rental equipment such as gas detection and alarms, breathing apparatus, breathing air systems, and various components.

Our inventory holds items including:

- Breathing air systems
- Fixed/wireless gas detection systems
- Portable gas monitors
- Fire ignition systems
- Air monitoring systems
- Auxiliary safety equipment

Safety equipment servicing and maintenance

Sunbelt is committed to providing the highest levels of after-sales and maintenance services for the equipment and solutions that it offers to its customers. Our agency agreements include personnel who are factory-trained to troubleshoot any problem that may arise.

We provide the following solutions:

- US DOT approved hydrostatic testing of cylinders

- SCBA servicing, flow test, and posi-check
- Gas detection, repair, and calibration
- Breathing air compressor maintenance
- Fire extinguisher service and repair
- Fall arrest equipment service and recertification

Safety training and supervision

Sunbelt is driven by a group of highly skilled H₂S instructors and field consultants who work with your personnel to ensure that they perform their duties safely when working in an H₂S environment. We provide your team with H₂S equipment training and knowledge on the dangers of working around hydrogen sulphide.

Our courses in H₂S safety awareness and breathing apparatus familiarisation follow the API-RP 49 and 55 guidelines, meet the OSHA requirements for drilling, workover, and production facilities, and are as per internationally approved standards ANSI Z-390.1-(R2017), ANSI Z-490.1, and NFPA.

Other H₂S safety training courses offered include:

- H₂S basic awareness training
- Train the trainer

Fire fighting systems

Sunbelt designs and supplies fire suppression systems, and our team of qualified professionals can install them and train your staff to ensure their safe and efficient use.

We supply the following systems:

- **Gaseous fire suppression:** CO₂ systems, Novec 1230, FM-200 and inert gas systems
- **Fixed fire extinguishing systems:** Water sprinklers and mist systems, mud process area and helideck foam systems and wet chemical systems

PAGA systems

Public Address and General Alarm (PAGA) and Public Address and Voice Alarm (PAVA) systems are essential for effectively communicating information to large areas or buildings used by the general public and employees, particularly those working in large fabrication yards or offshore.

Sunbelt offers Spector Lumenex PAGA and PAVA systems from Tyco, JCI. With over 35 years of industry experience, Spector Lumenex provides a wide range of proven and tested technological solutions renowned for their high quality and comprehensive capabilities. These wired communication solutions include:

- Audio broadcasts for both routine announcements and life safety emergency messages
- Visual and general alarm broadcasts suitable for onshore and offshore marine installations
- Clear emergency communication systems designed for the most challenging, hostile, and extreme environmental conditions
- Devices certified to ATEX & IECEx standards

Fire and gas detection systems

Sunbelt offers a complete range of fire and gas detection systems tailored to meet your specific needs, including both conventional and addressable detection options. We are committed to protecting your operations and offer compliance in any application.

We proudly partner with industry leaders Tyco, JCI, and Teledyne Technologies Incorporated to provide top-of-the-line fixed fire and gas detection systems. Teledyne Gas and Flame Detection is one of the largest and most trusted manufacturers in the field, known for their quality and reliability.

Our product offerings include:

- **Fixed gas and flame detection systems:** reliable solutions for continuous monitoring in industrial environments.
- **Portable gas detectors:** flexible, on-the-go monitoring devices for personal safety.
- **Area and wireless gas detectors:** advanced detection for larger areas and difficult-to-wire locations.

CCTV & video security solutions

Sunbelt is proud to be authorised system integrators for Pelco, a Motorola Solutions company, renowned for designing, developing, and manufacturing next-generation video security systems that set the industry standard. When working with us, you benefit from our expertise in designing, supplying, and installing these state-of-the-art systems. Our solutions conform to industry standards and are tailored to meet your specific security needs. Key features include:

- **Explosion proof:** heavy-duty housing solutions meet stringent explosion

- and ignition proof requirements, fully complying with international standards (UL, CSA, ATEX, IECEx, EACEx).
- **High-temperature range:** engineered to perform reliably in extreme temperatures, our systems operate seamlessly from -40°C (-40°F) to +80°C (+176°F).
 - **Water, corrosion, dust and impact resistant:** with ratings of NEMA Type 4X/6P and IP66/67/68/69, our products offer resistance to water, corrosion, and dust. Additionally, they are IK10 rated for impact resistance.
 - **Wide dynamic range and high light compensation:** Pelco systems deliver exceptional image detail, even in challenging lighting conditions, providing clear visuals in both bright and shadowed areas.

Fall protection and ladder safety systems

At Sunbelt, we are proud to be a authorised distributor and installer for the MSA-Latchways range of fall protection systems. Our dedicated team is fully authorised to repair, re-certify, and install fall protection products and vertical ladder kits across the UAE, Qatar, KSA, Iraq, and Bahrain. We provide high-quality fall protection equipment for wind turbine jackets and install ladder kits on offshore drilling rigs.

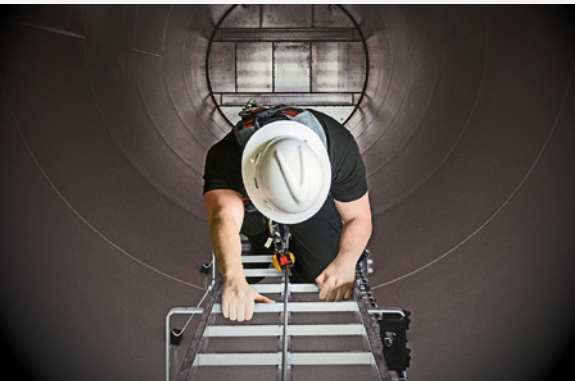

Innovative fall protection technology

MSA’s Self-Retracting Lifelines (SRLs) are designed to be completely field-serviceable. Featuring patented, frictionless braking technology, these products have no moving parts, ensuring they remain in perfect adjustment and require no recalibration throughout their lifespan.

Advanced vertical ladder kits

MSA’s vertical ladder kits come with an optional ladder latch climbing device that incorporates a unique star wheel. This design allows the unit to pass over cable supports without the need to detach, enhancing safety and efficiency. All components in our vertical systems are made from stainless steel to prevent corrosion in harsh offshore environments.

As an authorised distributor and installer, Sunbelt ensures you receive genuine, high-quality products and services tailored to your safety needs and designed to meet the highest standards.

PARTNERING
TO ADD VALUE

WHERE TO FIND US

Sunbelt's main operational centres and workshops are situated in the UAE, Saudi Arabia, Iraq, and Qatar. They are ideally located to access major oil & gas markets in the Middle East and North Africa and have the capability to service all our client's safety needs. Our facilities offer:
